

Ha Noi - Viet Nam

University of Engineering and Technology (UET)

EXPERIENCE

AMELA Technology - Software Developer

2023 - Present
Develop advanced web applications and work with a large scope

Luvina Software - Software Developer

2020 - 2023
Participating in projects where the customer is the Japanese market. As a member who enjoys building, maintaining and testing systems (Insurance, Commerce, Travel, IoT)

University - Student

2017 - 2020
Completing the study program before the deadline, contributing to the topic "RESULTS FORECAST AND LEARNING CONSULTATION" help provide information to students

Certificate

[React Basics by Meta \(Online\)](#)

[React Advance by Meta \(Online\)](#)

Vu Trung Anh

Java Developer

- P** +84375386676
- E** vutronganh1@gmail.com
- W** trunganhvu.github.io/cvweb

SUMMARY

- 3+ years developing web & mobile apps, APIs, & DB testing across diverse domains (insurance, IoT, commerce, tourism, education).
- Proficient in Java, Python, Javascript, SQL. Experienced bug hunter & fixer. Adept in Waterfall & Scrum. Prioritize quality & learning agility. Strong communication & organization skills. Basic knowledge of Docker, CI/CD, & AWS (EC2, S3).

SKILLS AND EXPERTISE

Technical Skills

- Programming Languages: Java, Python, Kotlin, JavaScript, VB.NET
- Databases: MySQL, PL/SQL, Sql server, PostgreSQL
- Frameworks: Spring, Servlet, Angular
- Tools: IntelliJ idea, Eclipse, Navicat, A5
- Version control: Git, SVN, CVS
- Cloud Computing: AWS, Docker, CICD
- Other: RPA, Asteria, Elastic Search

Soft Skills

- Communication
- Problem Solving
- Teamwork
- Leadership
- Time Management
- Learning Agility

PROJECTS

Offer Wall

09/2023-Now

Developer, Tester

System: Providing advertising services to support advertisers in attracting more customers, while assisting publishers in maximizing their revenue by offering consulting services on advertising sales.

Main responsibilities:

- Code APIs to serve partitioning functions (Japanese/Korean).
- Write unit tests, create a matrix of test cases.

Technology:

- Java Spring Boot
- MySQL
- Docker, CICD, AWS, Elastic Search, React

Recognition and Gains:

- Learn and work with docker, elasticsearch.
- Get to work with new technology and interesting projects.
- Learn how to develop software based on user experience.
- Upgrade skills in working with Docker and share with the team.

RAKUTEN KIKAN

04/2022-09/2023

Developer, Tester

System: The insurance system of a Japanese corporation. The object of use for employees at the insurance headquarters.

Main responsibilities:

- Design document.
- Coding, maintaining.
- Creating excel tool (create sql query).
- Handling customer data.
- Test the UT, IT, ST phases.
- Create data entry for test phases.
- Automated test bot code (RPA automation anything).

Technology:

- Java Core, Java Struct
- Oracel Sql
- Other (RPA, Asteria, VBA)

Recognition and Gains:

- Get acquainted with large project scale (~ 40 members).
- Upgrade skills in reading and investigating code (Java, Asteria).
- Upgrade manual test skills on insurance field.
- Ensure product quality and keep on schedule. Code, testcase, test evidennce less bugs, comments.
- Rated level 3.0 (get the job done, with quality assurance process improvements).
- Support team during development.

AEON COUPON

02/2022-04/2022

Developer

System: Coupon management system for trade floors, supermarkets, shopping malls.

Main responsibilities:

- Investigate bugs
- Fix IT bugs.
- Edit, optimize sql sentences.
- Test the UT, IT, ST phases.
- Create data entry for test phases.
- Automated test bot code (RPA automation anything).

Technology:

- Java Spring
- Angular
- Sql Server

Recognition and Gains:

- Learn how to optimize sql, angular.
- Ensure code quality before deploy to producttioin environment.

OPTIMAL REMOTE IOT

10/2021-02/2022

Developer

System: : Is an android phone application that allows from the computer to control the phone with a web browser.

Main responsibilities:

- Proposing, implementing new requirements of customers about remote android feature.
- Investigate bugs.
- Fix bugs.
- Optimized user experience.

Technology:

- Kotlin

Recognition and Gains:

- Upgrade skills using git.
- Learn android coding skills and working in the Scrum process.
- Rated level 2.1 (get the job done).
- 1 version feature development and deployed to the google play.

CLUB TOURISM PREMIUM

01/2021-10/2021

Developer, Tester

System: As a tour booking system, there are many benefits for members.

Main responsibilities:

- Design document.
- Coding, maintaining.
- Test the UT, IT, ST phases.

Technology:

- VB.NET
- Sql Server

Recognition and Gains:

- Get used to testing on different environments.
- Upgrade skills design and coding skills.
- Upgrade skills in creating investigative documents.

MANAGEMENT USER

09/2020-01/2021

Developer

System: Employees management system.

Main responsibilities:

- Design document.
- Build, Coding.
- Test the UT, ITphases.

Technology:

- Java Servlet
- MySQL

Recognition and Gains:

- Upgrade professional working skills, reporting.
- Upgrade java coding skills.

RESULTS FORECAST AND LEARNING CONSULTATION

01/2020-12/2020

Developer

System: : Is a support system that makes suitable subject suggestions for students based on resultsLearning results have been obtained, the suggested subject will have a specific predicted score. Additionsupplementing statistics on the score spectrum by faculty, branch, and subject. <http://112.137.129.132/>

Main responsibilities:

- Interface design, business flow, screen moving flow.
- Design database, source.
- Develop business data processing flow, use API to get forecast results,calculation and statistics.
- Deploy the product to the real environment.
- Create project documents.

Technology:

- Django, Bootstrap.
- PostgreSQL.

Recognition and Gains:

- Learn how to publicize products.
- Upgrade python code skills, database design.
- Graduation project gets an A.
